SKILLS

BACKEND

PHP 8, Python, FastAPI, MySQL 8, PostgreSQL, PDO, REST APIs

FRONTEND

HTML5, CSS3, JavaScript, TypeScript, Next.js, Bootstrap, Astro

MOBILE

Kotlin, Jetpack Compose, Room, Retrofit, Hilt

QUALITY & SECURITY

pytest, Playwright, GitHub Actions (CI), OWASP ZAP, JMeter

DEVOPS / INFRA

Docker, Dokploy, Linux, Nginx, Traefik, VPS

TOOLS

Git, GitHub, VS Code, MySQL Workbench, Claude Code

LANGUAGES

Spanish	Native
English	Intermediate

MANUEL ANDRÉS CÁRDENAS SUÁREZ

Software Analyst & Developer

PROFESSIONAL SUMMARY

Software Analyst and Developer (in training) with hands-on experience building end-to-end web, mobile, and desktop applications — from analysis and documentation to production deployment. Solid foundation in clean architecture, security, automated testing, and version control. I integrate AI tools into my workflow while keeping full technical ownership and code quality.

PROJECTS

KondID — Identity Document OCR Platform 2026

Capstone project · In production · Built with Emerson Corredor

- Reads scanned Colombian ID cards from SENA PDF batches with cascading OCR (Document AI → RapidOCR → Tesseract) and reconciles them against the official Excel roster.
- My part: two-factor authentication, HttpOnly cookie sessions, nonce-based CSP and rate limiting; 386 automated tests in CI and the technical documentation.

Stack: Python, FastAPI, PostgreSQL, Next.js, TypeScript, pytest, Playwright, Docker

BreadControl — Bakery Management System 2025 – Present

Real production project · Family bakery

- Sales, production, inventory, and finance with FIFO costing; Nequi/Wompi payments; Docker on a VPS.

Stack: PHP 8, MySQL 8, Bootstrap 5, PDO, Docker

ID Card Reader — Desktop OCR App 2026

In real use · SENA enrollment batches

- Local OCR of scanned ID cards in PDF, cross-checked against the enrollment spreadsheet; decodes the back-side PDF417 barcode. No data leaves the machine.

Stack: Python, Flask, RapidOCR, OpenVINO, OpenCV, PyMuPDF

Offline Project — Android Field Survey App 2025 – Present

Native offline-first mobile app · Ministry of Health use case

- Offline-first sync with Last-Write-Wins conflict resolution and the outbox pattern; Clean Architecture (MVVM) with a PHP/MySQL backend.

Stack: Kotlin, Jetpack Compose, Room, WorkManager, Retrofit, Hilt

SeguimientoSENA — Project Tracking System 2025 – Present

Web app with role-based access control

- Three roles (coordinator, instructor, learner), PDF/Excel export, and email password recovery.

Stack: PHP 8, MySQL 8, Bootstrap 5, PDO

EDUCATION

Associate Degree in Software Analysis & Development 2025 – 2027

SENA — Centro Tecnológico de la Amazonia, Florencia (Caquetá), Colombia

Technical Certificate in Systems (Labor Competencies) 2024

SENA

High School Diploma 2022

TEAMWORK

Projects in teams of two to four using Git/GitHub and clear division of responsibilities across the full cycle: analysis, documentation, implementation, testing, and deployment.
