SKILLS

BACKEND

PHP 8, MySQL 8, PDO, REST APIs

FRONTEND

HTML5, CSS3, JavaScript, Bootstrap, Astro

MOBILE

Kotlin, Jetpack Compose, Room, Retrofit, Hilt

DEVOPS / INFRA

Docker, Dokploy, Linux, Nginx, VPS

TOOLS

Git, GitHub, VS Code, MySQL Workbench, AI tooling

LANGUAGES

Spanish	Native
English	Intermediate

PROFESSIONAL SUMMARY

Software Analyst and Developer (in training) with hands-on experience building end-to-end web and mobile applications — from analysis and documentation to production deployment. Solid foundation in clean architecture, best practices, and version control. I integrate AI tools into my workflow to develop more efficiently while keeping full technical ownership and code quality. Team-oriented and committed to continuous learning.

PROJECTS

BreadControl — Bakery Management System

2025 – Present

Real production project · Family bakery

- Sales, production, inventory, and finance management with FIFO costing.
- Manual payment integration (Nequi/Wompi), reporting, and Docker deployment on a VPS.

Stack: PHP 8, MySQL 8, Bootstrap 5, PDO, Docker

Offline Project — Android Field Survey App

2025 – Present

Native offline-first mobile app · Ministry of Health use case

- Offline-first sync with Last-Write-Wins conflict resolution and outbox pattern.
- Clean architecture (MVVM); PHP/MySQL backend.

Stack: Kotlin, Jetpack Compose, Room, WorkManager, Retrofit, Hilt

SeguimientoSENA — Project Tracking System

2025 – Present

Web app with role-based access control

- Three roles (coordinator, instructor, learner) with PDF/Excel report export.
- Email-based password recovery and security hardening.

Stack: PHP 8, MySQL 8, Bootstrap 5, PDO

EDUCATION

Associate Degree in Software Analysis & Development

2025 – 2027

SENA — Centro Tecnológico de la Amazonia, Florencia (Caquetá), Colombia

Technical Certificate in Systems (Labor Competencies)

2024

SENA

High School Diploma

2022

TEAMWORK

Developed multiple projects within a four-person team, applying Git/GitHub version control, clear division of responsibilities, and shared server administration across the full cycle: analysis, documentation, implementation, and deployment.
